

Document Accessibility Compliance Tool

Automated WCAG 2.1 AA remediation for the notices, forms, and public documents human services agencies publish every day.

THE CHALLENGE

Human services agencies publish thousands of notices, forms, eligibility letters, and reports that must meet accessibility requirements.

Manual remediation is slow, inconsistent, and often reactive—while PDF, Word, and Excel documents can contain accessibility issues that are difficult to identify and fix at scale.

THE PLATFORM

1. Detect & Diagnose *Automated WCAG 2.1 AA analysis*

- Analyze structure, reading order, contrast, language, tables, links, and lists
- Identify scanned or image-based documents requiring additional review
- Map issues to relevant WCAG success criteria

2. Remediate *Accelerate remediation with automation and human review.*

- Automatically repair selected structural issues
- Generate AI-assisted alt-text suggestions
- Identify common accessibility issues in spreadsheets
- Preserve original files and generate remediated copies

3. Report & Govern *Monitor compliance across your document library*

- Document-level compliance scores and issue reports
- Batch processing for large document libraries
- Remediation logs and audit trails
- API integration with existing document management systems

One Connected Platform *Upload to audit-ready report, in one system*

- Configurable accessibility rules
- Integration with existing content and document systems
- Support for large-scale document remediation

BUILT ON A RESPONSIBLE-AI FOUNDATION

AI assists the remediation process—it does not replace human judgment

- Human in the loop and approval for AI-generated suggestions
- Transparent, criterion-level issue reporting
- Secure data handling and role-based access
- Complete audit trail of processing activity

BUILT FOR STATE & COUNTY HUMAN SERVICES IT

- Deployable on an agency's existing cloud infrastructure (AWS or Azure)
- Designed to align with WCAG 2.0, and the accessibility expectations underlying ADA and Section 508 compliance for public-facing documents
- Supports large-scale remediation of notices, forms, and correspondence
- Integrates with existing document and content management systems

Let's talk at ISM 2026 (Spokane, WA · Sept 27–30).
